1 INTRODUCTION

The MSCI Russia Select Size & Liquidity 10/40 Index (the “Index”) applies market capitalization and liquidity screening to the securities with a MSCI Country of Classification¹ of Russia that are listed on selected stock exchanges and reflects 10/40 constraints, i.e. the weight of any single group entity² is constrained at 10%, and the sum of the weights of all group entities with a weight of more than 5% is constrained at a maximum of 40%. The Index aims to represent the larger liquid segment of securities in the eligible Russian equity universe above the defined size and liquidity thresholds.

¹ MSCI Global Investable Market Indexes at www.msci.com/index-methodology

² For a definition and a description of the maintenance of Group Entities, please refer to the MSCI 10/40 Indexes methodology at www.msci.com/index-methodology

2 CONSTRUCTING THE MSCI RUSSIA SELECT SIZE & LIQUIDITY 10/40 INDEX

The MSCI Russia Select Size & Liquidity 10/40 Index is constructed in the following steps:

- Defining Eligible Universe
- Application of size and liquidity screening
- Application of the MSCI 10/40 Indexes methodology

2.1 DEFINING ELIGIBLE UNIVERSE

The Eligible Universe for the MSCI Russia Select Size & Liquidity 10/40 Index is derived by selecting all securities classified in Russia as per the MSCI Country of Classification. In addition, only securities trading on the stock exchanges listed below are eligible for the Index.

- Moscow Interbank Currency Exchange
- London Stock Exchange
- London International
- NASDAQ Global Market
- NASDAQ Capital Market
- NASDAQ Global Select Market
- New York Stock Exchange
- New York Stock Exchange Market LLC

2.2 APPLICATION OF SIZE AND LIQUIDITY SCREENING

The following market capitalization and liquidity screens are applied sequentially to the securities in the Eligible Universe from section 2.1:

- Include all securities with full market-capitalization greater than or equal to USD 250,000,000
- Include all securities with Domestic Inclusion Factor (DIF) adjusted 12-month Annualized Traded Value Ratio³ (ATVR) greater than or equal to 15%

³ MSCI Index calculation methodology at www.msci.com/index-methodology

- Include all securities with 6-month Annualized Traded Value⁴ (ATV) greater than or equal to USD 50,000,000
- Include all securities with 6-month Frequency of Trading⁵ (FoT) greater than or equal to 90%

Securities for which any of the above parameters is missing are not eligible for inclusion in the Index.

After the application of the above size and liquidity screens, the most liquid issue of each share class (for example: common and preferred) for each issuer is selected, ranked in the descending order of 6-month Annualized Traded Value. In case of two issues having the same 6-month Annualized Traded Value, a higher rank is given to the issue with higher DIF adjusted 12-month Annualized Traded Value Ratio. If this is also equal, then the issue with a higher 6-month Frequency of Trading is ranked higher.

The securities are weighted in proportion of their domestic free float-adjusted market capitalization.

2.3 APPLICATION OF THE MSCI 10/40 INDEXES METHODOLOGY

In the final step, the MSCI 10/40 Indexes methodology is applied so that no group entity has a weight above 10%, and the sum of weights of all group entities with weights above 5% does not exceed 40%.

Please refer to the following link for further details on the MSCI 10/40 Indexes methodology:

<https://www.msci.com/index-methodology>

3 MAINTAINING THE MSCI RUSSIA SELECT SIZE & LIQUIDITY 10/40 INDEX

3.1 SEMI-ANNUAL INDEX REVIEWS

The Index is reviewed on a semi-annual basis coinciding with the May and November Semi-Annual Index Reviews of the MSCI Global Investable Market Indexes. The pro forma Index is typically announced five business days before the Index Review effective date.

At each Index Review, the constituents are selected from the pro forma Eligible Universe as described below:

For securities that are not currently a part of the Index, the size and liquidity thresholds are the same as the ones used at initial construction:

- Include all securities with full market-capitalization greater than or equal to USD 250,000,000
- Include all securities with Domestic Inclusion Factor (DIF) adjusted 12-month Annualized Traded Value Ratio (ATVR) greater than or equal to 15%
- Include all securities with 6-month Annualized Traded Value (ATV) greater than or equal to USD 50,000,000
- Include all securities with 6-month Frequency of Trading (FoT) greater than or equal to 90%

For existing constituents of the Index, the size and liquidity thresholds are relaxed slightly, as described below, in order to reduce turnover:

- Include all securities with full market-capitalization greater than or equal to USD 200,000,000
- Include all securities with Domestic Inclusion Factor (DIF) adjusted 12-month Annualized Traded Value Ratio (ATVR) greater than or equal to 10%
- Include all securities with 6-month Annualized Traded Value (ATV) greater than or equal to USD 40,000,000
- Include all securities with 6-month Frequency of Trading (FoT) greater than or equal to 80%

Securities for which any of the above parameters is missing are not eligible for inclusion in the Index.

After the application of the above size and liquidity screens, the most liquid issue of each share class (for example: common and preferred) for each issuer is selected, ranked in the descending order of 6-month Annualized Traded Value. In case of two issues having the same 6-month Annualized Traded Value, a higher rank is given to the issue with higher DIF adjusted 12-month Annualized Traded Value Ratio. If this is also equal, then the issue with a higher 6-month Frequency of Trading is ranked higher.

The pro forma Index constituents are weighted according to the MSCI 10/40 Indexes methodology as described in section 2.3.

3.2 QUARTERLY INDEX REVIEWS

Coinciding with the February and August Quarterly Index Reviews of the MSCI Global Investable Market Indexes, the Index constituents are weighted according to the MSCI 10/40 Indexes methodology relative to the weight of the constituents in the Index in the proportion of their domestic free float-adjusted market capitalization.

Additions to the Eligible Universe are not included in the Index at the Quarterly Index Reviews and are considered for inclusion only at the Semi-Annual Index Reviews.

3.3 ONGOING EVENT RELATED CHANGES

Corporate events are handled according to the MSCI Global Investable Market Indexes methodology.

Any security deleted from the Eligible Universe as a result of a corporate event will be simultaneously deleted from the Index. In addition, securities of companies that file for bankruptcy, companies that file for protection from their creditors and/or are suspended and for which a return to normal business activity and trading is unlikely in the near future will be removed from the Index as soon as practicable. Companies that fail stock exchange listing requirements with announcements of delisting from the respective stock exchanges will be treated in the same way.

New securities added to the Eligible Universe are not simultaneously added to the Index, but are reviewed for inclusion at the subsequent Semi-Annual Index Review.

This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the “Information”) is the property of MSCI Inc. or its subsidiaries (collectively, “MSCI”), or MSCI’s licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the “Information Providers”) and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research Inc. and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research Inc. is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI’s products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, FEA, InvestorForce, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor’s. “Global Industry Classification Standard (GICS)” is a service mark of MSCI and Standard & Poor’s.
