INTRODUCTION

The MSCI US REIT Index is a free float-adjusted market capitalization weighted index that is comprised of Equity REIT securities. The MSCI US REIT Index includes securities with exposure to core real estate (e.g. residential and retail properties) as well as securities with exposure to other types of real estate (e.g. casinos, theaters).

The MSCI US REIT Index is based on the MSCI USA Investable Market Index (IMI) ("the parent index"), which is comprised of all the securities included in the MSCI USA Large Cap, MSCI USA Mid Cap and MSCI USA Small Cap Indexes. The MSCI USA IMI is governed by the MSCI Global Investable Market Indexes methodology that is available on MSCI's web site: http://www.msci.com/index-methodology.

At the November 2013 Semi-Annual Index Review, MSCI enhanced the MSCI US REIT Index methodology by transitioning the parent index used to derive the MSCI US REIT Index from the MSCI US Investable Market 2500 Index to the MSCI USA IMI. This change was implemented in order to align the parent index universe of the MSCI US REIT Index with the MSCI Global Investable Market Indexes.

This document contains the new enhanced guidelines used to maintain the MSCI US REIT Index. More details on the transition to the enhanced MSCI US REIT Index methodology are included in the Appendix.

1 DEFINING REITS AND THE MSCI US REIT INDEX ELIGIBLE REITS

A Real Estate Investment Trust, or REIT, is a company that in most cases owns and operates income producing real estate assets. Some REITs provide loans to the owners and operators of real estate. To qualify as a REIT under the Internal Revenue Code, a REIT is required to distribute at least 90% of its taxable income to shareholders annually and receive at least 75% of that income from rents, mortgages and sales of property.

MSCI classifies REIT securities into one of the nine Real Estate Investment Trust (REIT) Sub-Industries within the Global Industry Classification Standard (GICS®) structure. The REITs Sub-Industries are part of the Real Estate Industry, Real Estate Industry Group and the Financials Sector. The nine REITs Sub-Industries aim to represent REITs with distinct property type profiles.

REITs eligible for inclusion in the MSCI US REIT Index are REITs that are included in the MSCI USA IMI and that exhibit the following characteristics:

- Equity REIT structure (i.e., Mortgage REITs are not eligible)
- Real estate exposure (i.e., only selected Specialized REITs are eligible)
- REIT tax status (i.e., companies are not eligible before the beginning of their first fiscal year in which they are expected to be treated as REIT for tax purpose)

REITs Sub-Industries: Eligibility for the MSCI US REIT Index

REITs Sub-Industry	Eligibility for the MSCI US REIT Index
Diversified REITs	Yes
Health Care REITs	Yes
Hotel & Resort REITs	Yes
Industrial REITs	Yes
Mortgage REITs	No
Office REITs	Yes
Residential REITs	Yes
Retail REITs	Yes
Specialized REITs	Selected Specialized REITs only

REITs classified in the Specialized REITs Sub-Industry are eligible for inclusion in the MSCI US REIT Index only if they own and/or operate the following types of properties:

- Storage and self-storage facilities
- Data centers
- Correctional facilities
- Theaters
- Casinos and gaming facilities
- Restaurants¹

¹ Effective starting from the February 2016 Quarterly Index Review.

2 MAINTENANCE OF THE MSCI US REIT INDEX

The maintenance of the MSCI US REIT Index includes:

- Semi-Annual Index Reviews (SAIRs) in May and November,
- Quarterly Index Reviews (QIRs) in February and August, and
- Ongoing event-related changes which are generally implemented in the indexes as they
 occur

2.1 SEMI-ANNUAL INDEX REVIEWS AND QUARTERLY INDEX REVIEWS

During Semi-Annual Index Reviews and Quarterly Index Reviews, the parent index is reviewed under the guidelines of the MSCI Global Investable Market Indexes methodology. Changes in the parent index during Index Reviews may impact the MSCI US REIT Index as follows:

- Existing constituents of the MSCI US REIT Index that are deleted from the parent index are deleted from the MSCI US REIT Index
- Eligible equity REIT securities not currently constituents of the MSCI US REIT Index that are added to the parent index are added to the MSCI US REIT Index
- Changes in the Foreign Inclusion Factors (FIF) and Number of Shares (NOS) for securities of the parent index are also applied to the securities included in the MSCI US REIT Index
- When a change in Global Industry Classification Standard (GICS®) for an existing
 constituent of the parent index to one of the eligible REIT Sub-Industries defined in
 Section 1 is announced, then provided that the date of such announcement is before
 the implementation date of the next Index Review, such constituent may be considered
 for inclusion in the MSCI US REIT Index at such Index Review

In addition, the list of eligible property types for REITs classified in the Specialized REITs Sub-Industry is reviewed during each Semi-Annual Index Review and Quarterly Index Review. Changes to the list are communicated as part of the Index Review announcements and become effective at the subsequent Index Review.

For more information on Index Reviews for the MSCI Global Investable Market Indexes, please refer to Sections 3.1 and 3.2 of the MSCI Global Investable Market Indexes methodology book.

2.2 ONGOING EVENT-RELATED CHANGES

The parent index is updated to reflect ongoing event-related changes in accordance with the MSCI Global Investable Market Indexes methodology. Ongoing event-related changes in the parent index are reflected in the MSCI US REIT Index at the time of the implementation of the event in the parent index:

- Existing constituents of the MSCI US REIT Index that are deleted from the parent index due to corporate events are deleted from the MSCI US REIT Index
- Eligible equity REIT securities not currently constituents of the MSCI US REIT Index that are added to the parent index due to corporate events are added to the MSCI US REIT Index
- Changes in the Foreign Inclusion Factors (FIF) and Number of Shares (NOS) for securities
 of the parent index due to corporate events are also applied to the securities included in
 the MSCI US REIT Index

For more information on the implementation of corporate events in the MSCI Global Investable Market Indexes, please refer to Section 3.3 of the MSCI Global Investable Market Indexes methodology book.

2.3 ANNOUNCEMENT POLICY

In line with the MSCI Global Investable Market Indexes methodology, the changes to the MSCI US REIT Index are typically announced at least ten business days prior to these changes becoming effective in the indexes as "expected" announcements, or as "undetermined" announcements, when the effective dates are not known yet or when aspects of the event are uncertain. MSCI sends "confirmed" announcements at least two business days prior to events becoming effective in the indexes provided that all necessary public information concerning the event is available. In case a "confirmed" announcement needs to be amended, MSCI sends a "correction" announcement with a descriptive text announcement to provide details about the changes made.

If warranted, MSCI may make descriptive text announcements for events that are complex in nature and for which additional clarification could be beneficial for any Standard, Small Cap and Micro Cap Indexes.

For more information on the announcement policy for the MSCI Global Investable Market Indexes, please refer to Section 3.4 of the MSCI Global Investable Market Indexes methodology book.

APPENDIX I: PAST METHODOLOGY CHANGES FOR THE MSCI US REIT INDEX

CHANGES APPLIED AT THE NOVEMBER 2013 SEMI-ANNUAL INDEX REVIEW

Effective at the time of the November 2013 Semi-Annual Index Review, MSCI enhanced the MSCI US REIT Index methodology by transitioning the parent index used to derive the MSCI US REIT Index from the MSCI US Investable Market 2500 Index to the MSCI USA IMI. This change was implemented in order to align the parent index universe of the MSCI US REIT Index with the MSCI Global Equity Indexes.

To reduce index turnover following the transition to the enhanced MSCI US REIT Index methodology, current constituents of the MSCI US REIT Index will remain eligible for inclusion in the MSCI US REIT Index as long as they remain in the MSCI USA Micro Cap Index.

APPENDIX II: GLOBAL INDUSTRY CLASSIFICATION STANDARD (GICS)

INTRODUCTION

The Global Industry Classification Standard (GICS) was developed by MSCI in collaboration with S&P Dow Jones Indices to provide an efficient, detailed and flexible tool for use in the investment process. It is designed to respond to the global financial community's need for a global, accurate, complete and widely accepted approach to defining industries and classifying securities by industry. Its universal approach to industry classification aims to improve transparency and efficiency in the investment process.

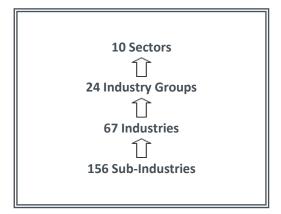

KEY FEATURES OF THE GICS

The key features of the GICS are that it is:

- Universal: the classification applies to companies globally.
- Accurate: the structure precisely reflects the state of industries in the equity investment universe.
- Flexible: the classification consists of four levels of analysis, ranging from the most general to the most specialized sub-industry.
- Evolutionary: annual reviews are conducted to ensure that the classification remains fully representative of the universe.

To provide the level of precision critical in the investment process, the GICS is designed with four levels of classifications:

The Global Industry Classification Standard (GICS)

The GICS has 10 sector classifications:

- Energy
- Materials
- Industrials
- Consumer Discretionary
- Consumer Staples
- Health Care
- Financials
- Information Technology
- Telecommunication Services
- Utilities.

PHILOSOPHY AND OBJECTIVES OF THE GICS

The way in which securities are classified into asset classes forms the basis of many important investment decisions. The relative merits of each security are judged primarily within these asset classes, and investment decisions are taken within this framework.

APPROACHES TO INDUSTRY CLASSIFICATION SCHEMES

While grouping securities by country and regions is relatively straightforward, classifications by industries are more difficult. There are many approaches to developing industry classification schemes, some of which are discussed below.

At one extreme is the purely statistical approach, which is solely financial market-based and backward looking, using past returns. Aggregations are formed around correlation, often yielding non-intuitive groupings that are dissimilar across countries and regions. Another approach attempts to define a priori financial market-oriented groups or themes, such as cyclical, interest rate sensitive, etc. The difficulty, however, lies in finding widely accepted and relatively stable definitions for these themes.

Two other approaches begin with an economic perspective on companies. The first focuses on a production orientation while the other adopts a market or demand orientation in company analysis. The production-oriented approach was effective in the past in its analysis of the microstructure of industries from the producers' standpoint. For instance, it segregated goods and services on the premise that it was a different set of companies that provided each to consumers. As the structure of the global economy evolved, limitations of

this approach became increasingly obvious. The ever-increasing share of discretionary income brought about by economic development, emergence of the service era, and the availability and accessibility of information with the advent of new communication technology has moved the emphasis from producers to consumers.

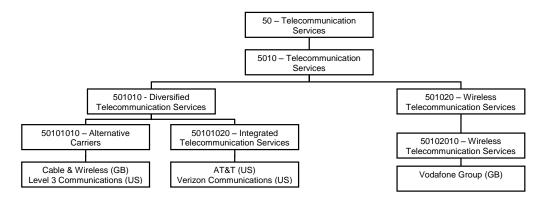

THE GICS: MARKET DEMAND-ORIENTED

The Global Industry Classification Standard is designed to be market demand-oriented in its analysis and classification of companies. For example, drawing the line between goods and services is becoming increasingly arbitrary as they are now commonly sold together. This distinction between goods and services is replaced by adopting the more market-oriented sectors of "Consumer Discretionary" and "Consumer Staples", which group goods and services sub-industries. In addition, the creation of large stand-alone sectors such as Health Care, Information Technology and Telecommunication Services accurately represents industries that provide significant value to the consumer in today's global and integrated economy. This further contributes to a more uniform distribution of weights among the 10 sectors.

GICS COMPANY CLASSIFICATION

The GICS is used to assign each company to a sub-industry according to its principal business activity. Since the GICS is strictly hierarchical, a company can only belong to one grouping at each of the four levels.

An Illustration of the GICS – Telecommunication Services Sector:

CLASSIFICATION BY REVENUE

In order to provide an accurate, complete and long-term view of the global investment universe, a company's revenues often provide a more stable and precise reflection of its activities than earnings. Furthermore, industrial and geographical breakdowns of revenues are more commonly available than earnings broken down the same way for most companies. Nevertheless, company valuations are more closely related to earnings than revenues. Therefore, earnings remain an important secondary consideration in a company's industry classification.

GENERAL GUIDELINES FOR CLASSIFICATION

The primary source of information used to classify securities is a company's annual reports and accounts. Other sources include brokers' reports and other published research literature. As a general rule, a company is classified in the sub-industry whose definition most closely describes the business activities that generate at least 60% of the company's revenues.

Example: Nokia (FI)

2013 Results	Nokia Networks	Nokia Technologies	HERE
Revenues	89%	4%	7%
Earnings	88%	24%	-12%

Classified as:

GICS Level	GICS Code	Code Description		
Sector	45	Information Technology		
Industry Group	4520	Technology Hardware & Equipment		
Industry	452010	Communications Equipment		
Sub-Industry 45201020		Communications Equipment		

However, a company engaged in two or more substantially different business activities, none of which contribute 60% or more of revenues, is classified in the sub-industry that provides the majority of both the company's revenues and earnings. When no sub-industry provides the majority of both the company's revenues and earnings, the classification will be determined based on further research and analysis. In addition, a company significantly diversified across three or more sectors, none of which contributes the majority of revenues

or earnings, is classified either in the Industrial Conglomerates sub-industry (Industrial Sector) or in the Multi-Sector Holdings sub-industry (Financials Sector).

Example: General Electric (US)

2006 Results	Infrastructure	Industrial	Healthcare	NBC Universal	Comercial Finance	Consumer Finance
Revenues	30%	21%	10%	10%	15%	14%
Earnings	34%	10%	12%	11%	19%	13%

Classified as:

GICS Level	GICS Code	Code Description
Sector	20	Industrials
Industry Group	2010	Capital Goods
Industry	201050	Industrial Conglomerates
Sub-Industry	20105010	Industrial Conglomerates

In the case of a new issue, the classification will be determined based primarily on the description of the company's activities and pro forma results as given in the prospectus.

REVIEW OF SUB-INDUSTRY CLASSIFICATION

A company's sub-industry classification will be reviewed either when a significant corporate restructuring occurs or when a new annual report is available. In order to provide a stable sub-industry classification, when reviewing a company's classification, changes will be minimized in the sub-industry classification to the extent possible by disregarding temporary fluctuations in the results of a company's different activities.

In the event that the above guidelines should not appropriately capture a particular company's business activity, its classification will be determined based on more extensive analysis.

GICS STRUCTURE REVIEW FREQUENCY

MSCI and S&P Dow Jones Indices are committed to ensuring that the GICS structure remains relevant and up-to-date. This is accomplished through an annual review of the structure. This review includes a detailed internal analysis to develop a proposal for potential structural changes and public request for comments and in-depth client consultations with various market participants as a means of obtaining feedback on proposed structural changes.

METHODOLOGY BOOK TRACKED CHANGES

The following sections have been modified since February 2014:

Section 1: Defining REITs and the MSCI US REIT Index Eligible REITs

Updates in this section

The following sections have been modified since June 2015:

Section 1: Defining REITs and the MSCI US REIT Index Eligible REITs

Update to the list of eligible property types

The following sections have been modified since November 2015:

Section 1: Defining REITs and the MSCI US REIT Index Eligible REITs

Added "Restaurants" to the list of eligible property types

Section 2.1: Semi-Annual Index Reviews and Quarterly Index Reviews

Added a paragraph on the review process for the list of eligible property types

The following sections have been modified since December 2015:

Section 1: Defining REITs and the MSCI US REIT Index Eligible REITs

Added "REIT tax status" as a condition for eligibility

ABOUT MSCI

For more than 40 years, MSCI's research-based indexes and analytics have helped the world's leading investors build and manage better portfolios. Clients rely on our offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research.

Our line of products and services includes indexes, analytical models, data, real estate benchmarks and ESG research.

MSCI serves 98 of the top 100 largest money managers, according to the most recent P&I ranking.

For more information, visit us at www.msci.com.

NOTICE AND DISCLAIMER

This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the "Information") is the property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), or MSCI's licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the "Information Providers") and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or redisseminated in whole or in part without prior written permission from MSCI.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research Inc. and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research Inc. is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, FEA, InvestorForce, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and Standard & Poor's.
